New account-level audience filters

If you don't want to see titles for certain audiences while you browse or search the digital collection, you can set account-level [audience filters](#). For example, you might want to set account-level audience filters if you only want your children to see juvenile and YA titles.

Audience filters

Choose the type(s) of content you'd like to see while browsing and searching the collection.

Note: The new "audience filters" setting replaces the old "maturity levels" setting.

The whole digital library on any device

You can now browse and search through your library's entire digital collection on any device. Previously, any titles that didn't work on the device you were using at the time were hidden. The new OverDrive shows you everything in your library's digital collection, with clear messaging about titles that aren't compatible with your current device. This way, you can borrow or place a hold on any title, from anywhere.
